DETAILED ACTION

Specification

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 17 and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Chaudhuri et al. U.S. Patent no. 7,031,299.

Regarding claim 17, Chaudhuri discloses a method of performing automatic recovery of a control plane network in an optical communications system, the comprising:

detecting a failure in a control link between a first node and a neighboring node (Col. 15, lines 59-61);

at the first node, determining an alternate route to the neighboring node (Col. 15, line 65 to Col. 16, line 11, Col. 16, lines 40-52);

at the first node, establishing an IP-in-IP tunnel to the neighboring node based on the alternate route (Col. 15, line 65 to Col. 16, line 6);

maintaining at the first node a forwarding redirection table (col. 17, lines 3-44 discloses the first hop router stores all of the restoration routes for which it is responsible and calculates the total restoration resource required for these routes on each link in the network and for each different link failure; Col. 21 , lines 34-58 further discloses the first hop router stored the information in the IP routing table (e.g., equivalent to a forwarding redirection table);

updating, at the first node, the forwarding redirection table to map forwarding interfaces leading to the neighboring node via the IP-in-IP tunnel (Col. 15, line 65 to Col. 16, line 6; Col. 16, lines 40-52; Col. 17, lines 3-44).

Regarding claim 18, Chaudhuri discloses forwarding IP packets at the first node according to the forwarding redirection table (Col. 18, lines 9-11).

Response to Arguments

3. Applicant's arguments with respect to new claims 17 and 18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
